Dear Recruiting Team,

With this letter I hereby wish to apply for the **Senior Data Scientist** position at Employer Name in Capitalized Title.

I do believe that combination of three things: my long-term experience as a Data Scientist, extensive knowledge of Machine Learning algorithms and tooling as well as talent for gaining new domain knowledge very fast makes me the right candidate for this position. As you may note in my CV, I coordinated multiple international teams and produced high quality localized websites. For several years I was taking care of the customer needs by providing and delivering professional, helpful, high quality service and assistance before, during, and after the customer's requirements are met. My various roles within Internet related companies were all focused on customer satisfaction. I have always been trying to understand consumer's needs in order to provide the best service. French native who lived and worked in many different places, I am an open-minded person, able to think out of the box and with a good sense of humor. I can communicate effectively and efficiently at all levels of hierarchy and I know how to recruit, coach and motivate teams.

Please find out more on my qualifications by reading enclosed Résumé. Thank you very much in advance for your consideration. If you have any further questions regarding my candidature, please contact me via tele-

phone or e-mail.

Sincerely yours,

FirstName LastName
